

VaultCam

DECENTRALIZED EVIDENCE NETWORK

Solana · Lit Protocol · Arweave · LiveKit · SKR Token

SUBMITTED TO | CLOCK IN · The Solana Mobile Hackathon

THE PROBLEM

47%

of drivers **without recorded footage** lost their insurance dispute

NHTSA Research 2025 · 14,200 incidents analyzed

No proof, no justice

Accidents happen in seconds. Without video, it's your word against theirs.

Existing dashcams fail

Local storage is mutable. No chain of custody. Easily disputed in court.

Witnesses drive away

Bystanders with crucial footage have no incentive to stop and share.

THE SOLUTION

Three product layers. One network effect.

B2C · INDIVIDUAL DRIVERS

Continuous dashcam recording. On collision detection, footage is encrypted (Lit Protocol) and stored permanently on Arweave. Recovery requires wallet signature — the key never touches the device.

P2P · EVIDENCE NETWORK

Impact triggers BLE + Waku alerts to nearby vehicles. Drivers who contribute footage earn SKR token rewards. Every incident gets an on-chain hash — GPS, timestamp, and contributing wallet addresses.

B2B · FLEET MANAGEMENT

Live streaming of fleet cameras via LiveKit (<500ms latency). Multi-camera dashboard for operators. Monthly USDC or SKR subscription per active device.

🔐 **Encryption key stays on-chain, never on the device.** Lit Protocol nodes reconstruct it only when on-chain conditions are met — owner signature, payment, or court order.

COMPETITIVE LANDSCAPE

The dashcam market has no blockchain-native competitor

PRODUCT	IMMUTABLE STORAGE	P2P ALERT NETWORK	ON-CHAIN PROOF	CRYPTO REWARDS	MOBILE NATIVE
VaultCam	✓	✓	✓	✓	✓
Nextbase 622GW	✗	✗	✗	✗	✗
BlackVue DR970X	✗	✗	✗	✗	✗
Samsara Fleet	✗	✗	✗	✗	✗
Garmin Dash Cam	✗	✗	✗	✗	✗

TOTAL ADDRESSABLE MARKET

$8.5B dashcam market · +12% YoY

500M+ dashcam-equipped vehicles by 2027. US insurance fraud costs $40B/year — video evidence is the fastest-growing countermeasure.

WHY NOW

Hardware commoditized. Blockchain mature.

Every phone is a dashcam. Solana runs 65,000 TPS at <$0.001/tx — real-time evidence at scale is viable today.

BUSINESS MODEL

Three revenue streams.
One network that grows itself.

B2C — PAY PER RECOVERY

Owner recovers footage free. Third parties pay **USDC or SKR** per video access. Evidence requests from insurers and legal teams generate recurring revenue.

P2P — TOKEN ECONOMY

Drivers earn **SKR** for contributing footage to active incidents. Token demand grows with network adoption. No marketing spend required — incentive drives acquisition.

B2B — FLEET SAAS

Monthly subscription per active vehicle. Live camera dashboard, incident reporting, and on-chain audit trail. Target: logistics, ride-hailing, and municipal fleets.
